

## **TractionCOTE™ Detailed Application Instructions**

### **Tools Required:**

Cleaning: 1x ~5 gallon pail – clean  
Cleaning: Extraction tool/wet vac (recommended)  
or mop/sponge mop or squeegee  
Cleaning: Brush/Deck Brush  
Application: Low nap roller/kit (recommended) / Bristle Brush or  
Airless Sprayer

**\*\*Read all instructions before starting application process.\*\***

### **PRE-APPLICATION:**

Make sure surface to be treated is clean, free of any dirt, debris, grease, oils or other contaminants. **DO NOT APPLY** at temperatures below 50°F or above 90°F. **TEST** a small hidden area or extra piece to ensure adhesion and review for any adverse effects.

### **Application Directions**

1. **CLEAN, RINSE & DRY SURFACE** to remove all dirt and soap residue. Allow to dry.
2. **SHAKE WELL and POUR** into supplied paint tray.
3. **ROLL** onto surface with supplied roller, using smooth overlapping strokes. Roll out to even, flat finish.
4. **ALLOW TO DRY** approximately 30 min. Apply 2<sup>nd</sup> coat, if desired. Do not use tub for 12 hrs.

**APPLICATION CLEAN UP:** Clean spills with soap and warm water, immediately, do not allow to dry.

**ROUTINE CLEANING:** Clean with mild soap and water. **DO NOT USE** abrasive cleaners or pads

**REMOVAL:** TractionCote™ can be removed with isopropyl alcohol or any commercial paint stripper.

Do not walk on for 2 hrs. Full cure in 24-48 hours before heavy use.

### **Post application:**

Surface Solutions TractionWash™ is recommended for routine cleaning (@ 1:20 dilution).

ReApply approx. every 3-6 mos or as wear patterns develop. Actual effective life will vary depending on type, frequency and weight/abrasion and traffic patterns.
